Introduction

This analysis is part of Jordan strategy Forum's (JSF) efforts towards Jordan's economic development through shedding light on Jordan's bilateral trade – domestic exports, re-exports, and imports – with all countries around the world. Hence, this series of "Knowledge is Power" tackles Jordan's trade with Gulf Cooperation Council (GCC) countries – Saudi Arabia, United Arab Emirates, Bahrain, Kuwait, Qatar, Oman, and Yemen.

An in-depth analysis of the trade between Jordan and these countries is presented through briefings, tables, and graphs that show the values of trade between Jordan and each GCC country, the potential that is still being untapped for Jordan in each GCC country, and the Sophistication* of products and countries' markets as whole.

This analysis provides strategic information for industrialists and investors that will assist them in their growth strategies and efforts to expand their business and develop new markets. This analysis also aims to provide a tool for evidence-based policymaking and assist decision-makers in their efforts to enhance Jordan's economic prosperity.

* Sophistication: A measure of industrial products' added value and contribution to the exporter country's economic complexity.
