

## Jordan Investor Confidence Index

### Update for March 2018

The **Jordan Investor Confidence Index**® is a monthly-issued index published by the **Jordan Strategy Forum** that aims to measure the confidence of investors operating in the Jordanian market through three aspects: confidence in the Jordanian Dinar and the monetary system, confidence in the real economy, and confidence in the Amman Stock Exchange (ASE).

The index measures the impact of policy decisions and exogenous developments on investor confidence. Furthermore, it aims to facilitate a better understanding for investors and promote a strong decision-making process, be it in policy-making by the public sector or investing decisions by the private sector.

The production of this index complements Jordan Strategy Forum's consistent effort to promote higher levels of investment in Jordan, and a more competitive business environment that can facilitate higher quality of life for all Jordanians.

Jordan Strategy Forum's **Jordan Investor Confidence Index**® has decreased in March 2018 to reach 85.48 points in comparison to 87.20 points in February 2018, as it decreased by 1.72 points.

As for the sub-indicators; confidence in the **Monetary Sub-Index** observed a slight decrease of 0.35 point to reach 75.06 points in March 2018, as CBJ Gross Foreign Reserves dropped by 167.9 Million JDs to reach 11.64 Billion JDs for this month. While the interest rate differential increased to reach 4.25% in comparison with 4% in February 2018.

Confidence in the **Real Economy Sub-Index** witnessed a decrease by 1.74 points, to reach 121.8 points, as the number of companies registered in March 2018 decreased to reach 525 companies in comparison with 530 companies registered in February 2018. In addition, the capital of companies' registered witnessed a decrease as it reached 7.2 Million JDs. On the other hand, the number of construction permits increased slightly to reach 2241 permits in March 2018 in comparison with 2205 permits in February 2018. The manufacturing quantity production index also increased by 2 points to reach 85.9 points. On the other hand, tax on the monthly real estate volume remained unchanged since February 2018, as it reached 8.70 Million JDs.

Confidence in the **ASE Sub-Index** observed a 0.37 points increase to reach 88.62 points in March 2018, as the ratio of inflow to outflow of foreign investment in ASE increased to reach 108%. The ASE index also increased by 13.59 points to reach 2233.26 points in March 2018.

It is worth mentioning that the Investor Confidence Index aims to measure the level of confidence investors have in its three sub-indices based on the sub-indices expected values according to its trends since 2007 up until now. A decrease in the value of one of the sub-indices despite increases in its indicators means that the indicators values fell below its expected values according to the trend. Similarly, an increase in any sub-index despite decreases in its indicators means that the indicators' values stay above its expected values according to the trend.
